Embdedded Works believes that no company should be left behind in the wireless revolution. When it comes to wireless & embedded technologies, we provide the industry's most comprehensive product line card. From short range to long range wireless, our products are 'OEM Friendly' which means we specialize in embeddable components and provide integration support throughout the design chain. Whether your company is introducing a wireless product for the first time, or looking to expand your wireless portfolio, we have enabled companies of all sizes from small startups to Fortune 500 companies to realize their wireless and embedded potential. Contact us and let us help you Make it Wireless!

End-to-End Wireless and M2M Diversity

T echnology Diversity

Connecting machines to the Internet cloud has become easier due to the diversity of wireless

standards available today. From WPAN to WLAN to WWAN, we carry a full spectrum of wireless networking products to address most any application. Choosing the right computing platform is also important in any design, hence we offer an array of single board computers, touch panel, and industrial PC systems from leading CPU core suppliers. Navigate our popular website and you can filter down to the technology and part that fits your needs. If you are looking to add connectivity to your product, we can help you make the most informed buying and design decisions. Contact us for a **FREE CONSULTATION** and LETS CONNECT!

S ervice Diversity

Getting your product from proto-type to market is a multi-dimensional technical feat which involves

project planning and design expertise across many engineering disciplines. Embedded Works is experienced in the challenges of RF integration at all levels of the design chain. Our extensive network of RF designers, chipset vendors, and embedded developers enables us to become your extended engineering team, and we will work with your in-house team to assure your project is **ON BUDGET and ON TIME!**

- **Technology Consultation**
Product, Antenna, Regulatory Certs.
- **Software Development**
Device drivers, Mobile Apps, Platforms

M 2M Diversity

The Machine-to-Machine (M2M) industry encompasses more than just one technology, it involves a

whole ecosystem of products and connected services all working together to solve a problem. We do M2M. Embedded Works is your End-to-End M2M Technology Shop:

- **M2M Cellular**
2G/3G/4G for GSM/CDMA/LTE/SATCOM
- **M2M Hardware**
Embedded Modules, Modems, Routers
- **M2M Data Connectivity**
Custom, 50KB, 1MB, 100MB, 10GB, etc. SMS Only, Domestic & International SIM
- **M2M Service**
Data Portal, Online Tracking & Alerts
